FAIRVIEW RESIDENT CHOSEN FOR GRADUATE ASSISTANTSHIP AT UNIVERSITY OF B.C.

Melvin Lungle, a graduating senior in chemistry at the University of Montana from Fairview, Alta., has been selected for a teaching assistantship at the University of British Columbia.

He has studied at the Missoula school for two years, working as an undergraduate research assistant on an American Chemical Society Petroleum Research Fund grant. His research concerned relative rates of the reaction of ozone with several types of organic compounds in order to determine the reaction mechanisms involved.

Dr. R.E. Erickson said Lungle's studies resulted in some unexpected findings that will be published in chemical journals within the next year. Dr. Erickson describes Lungle as showing "definite promise of high achievement in chemistry while at the University of Montana. The assistantship, which will allow him to pursue a Ph. D. at the University of British Columbia, is well-deserved."

His parents are Mr. and Mrs. William Lungle of Fairview.
